

PHASE III: POST DISCUSSION SURVEY #1

In this phase, you will have 15 minutes to check what the other two committee members have talked about during their small group discussion (in the format of a chatlog). The chatlog was originally generated in Mandarin, and it is converted into English through machine translation.

You will be asked to recommend one applicant for this RA position after checking the other group's chatlog. The recommended applicant should be the one who has the *highest* number of preferred qualifications.

You will be asked to complete a short survey about your overall experience about your review of the chatlog.
